Forecast for Thursday 22 Oct 2020

Weather: Weather conditions will be quite poor during the morning with patchy rain and poor visibility, precipitation is likely to be wintry on higher munro tops. Later the rain will become lighter and clear most ranges by lunchtime. By late afternoon there may be a few breaks in the cloud and the odd sunny spell particularly in the west around Arrochar. The Lochaber ranges and Glencoe may not see cloud lift and clear so readily.

Chance of cloud free mountain/hill tops above 800m: In the morning just a 10% chance with cloud bases around 3-500ft, cloud will gradually lift and break with a 70% chance of cloud free tops by mid afternoon although the higher munros are unlikely to clear.

Visibility: Visibility will be poor in the morning however it will become moderate or even good in places by late afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Becoming quite windy for a time in the morning as the rain moves across the area. The winds will be northerly in the morning and it will feel very cold. Winds becoming southwesterly and easing later so losing some of the wind chill.

Forecast for Friday 23 Oct 2020

Weather: Another band of rain is expected to push east across Scotland on Friday morning, this will move through quite quickly and is not expected to be as heavy as Thursday's rain. It will be dry with sunny intervals for a time before showers develop on Friday afternoon. Showers will be more frequent on western ranges around Loch Lomond, the east will see very few showers. Showers are likely to be hail or snow on the higher munro tops.

Maximum wind: Southwesterly 15-20 mph with gusts around 25-30mph.

Chance of cloud free mountain/hill tops above 800m: 40% in the morning, bases will be around 5-600ft increasing to 80% in the afternoon.

Visibility: Poor for a time in the morning as the rain band pushes east but becoming mainly good in the afternoon except in showers.

Temperature: **Glens:** Plus 10 Celsius
At 800m: Plus 2 Celsius.
Freezing level: Around 1000m.
